Authorization for this examiner's amendment was given in a telephone interview with Russell Gross, on September 27, 2004.

Allowable Subject Matter

1. Claims 1-46 are allowed.
2. The following is an examiner's statement of reasons for allowance:

All claims stand and fall together. Claim 1 is selected as representative of the rest. In claim 1, the requirement is specific, in that, quality enhanced residual images are generated from downscaled input image frames and base layer frames, wherein base layer frames are derived from encoding downscaled input image frames. Furthermore, the generated enhanced residual images are then encoded using fine granular coding technique, which by definition involves spatial scalability of the input images and bit-plane coding. The prior art of record do not fairly teach or anticipate the above as claimed. They do teach however, fine granularity coding, but the manner in which enhancement frames are generated as claimed is not taught.

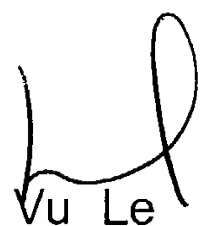

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
